Vincent Keunen, intro

CEO & founder Andaman7

CIO of the year 2016

TED Talk on YouTube

Distributed Medical Record for prevention work

- 1 million patients - 400 doctors-nurses

Secure medical messaging

- 90% of Belgian family doctors, hospitals & labs

Problems

1. Patients

Targeted treatments

Scattered health data

2. Care 3. R&D

Patient access:

Continuity of care

Virtual trials, RWE, PRO

& more

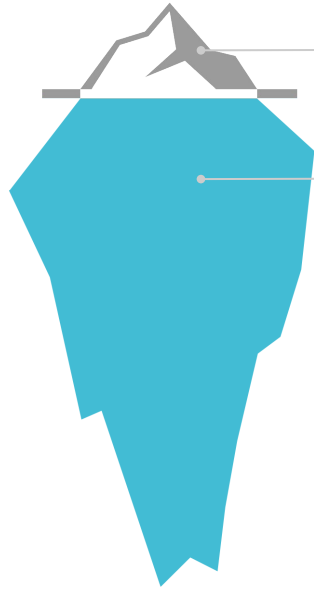

Can we do all 3?

- › Empowering Patients
- › Care providers: Managing diseases
- › Research: Measuring outcomes

One platform - All conditions

The Andaman7 solution

Patient facing mobile app - PHR and more

HIP - Health Intermediation Platform

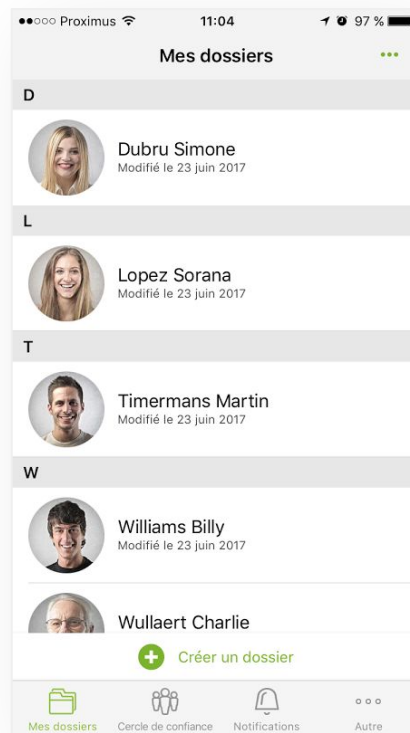

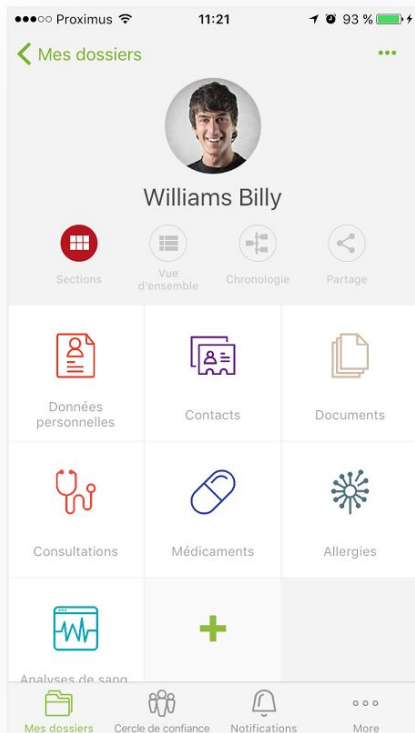

- High security & privacy
 - Peer-to-peer, no cloud storage
 - Security by design, privacy by default
 - GDPR
- High interoperability
 - Open API & connectors
 - Liquid data model

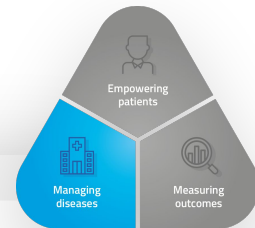

Andaman7 patient centered HIP[©]

Mobile PHR as foundation... & more

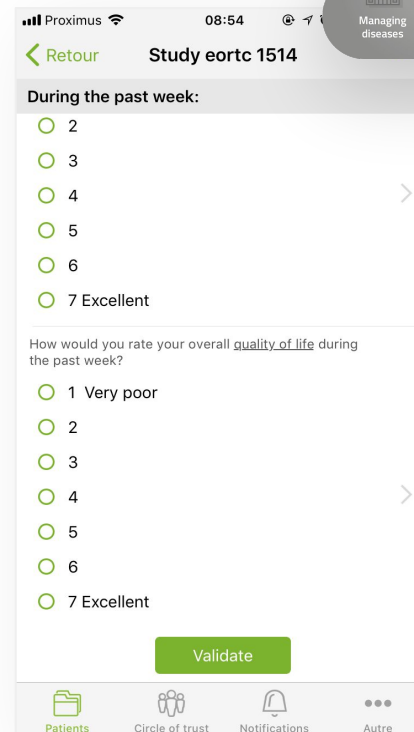

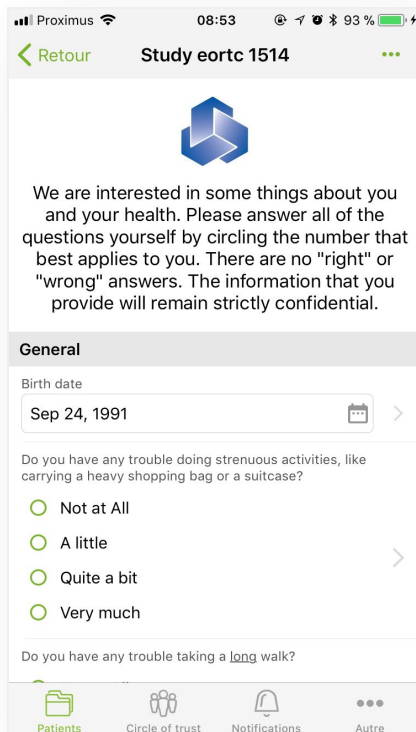

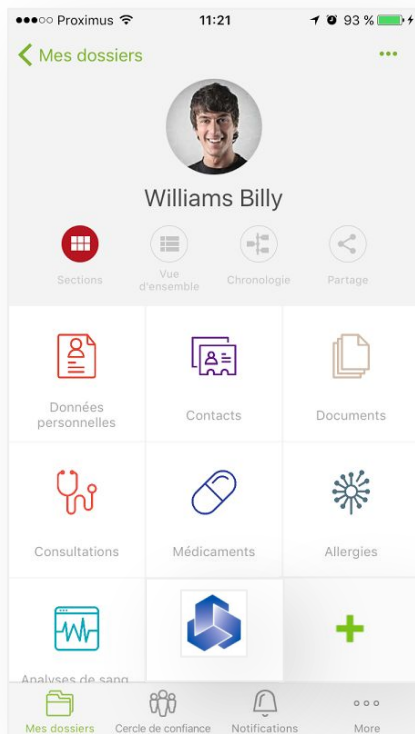

More? Care coordination

- ✓ Two ways data exchange
- ✓ Data and content
- ✓ Monitoring + coaching
- ✓ Collect medication, test results...

More? Clinical trials, PRO, RWE

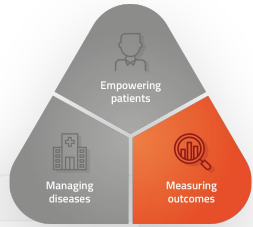

Enrollment

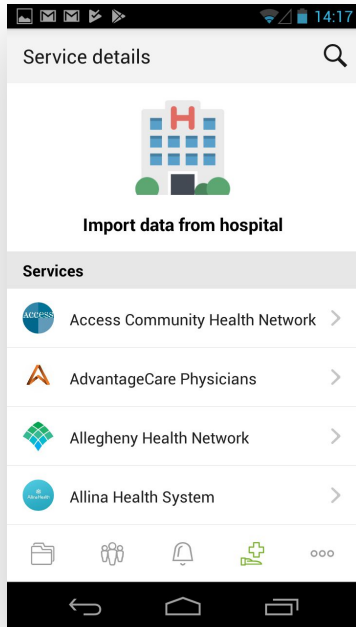

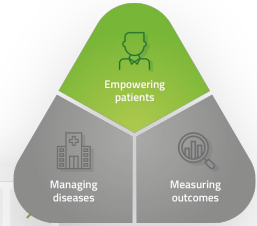

- eConsent
- Delivering information to patients: docs, video
- Registries and virtual cohorts

40 hospitals, 10 countries, 10 languages
And the patients themselves...

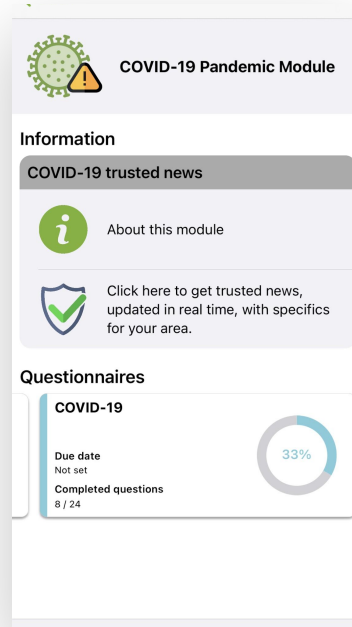

The screenshot shows the Andaman7 interface for EORTC. The top part displays the 'Patient registration form' with fields for Patient last name, Patient first name, Patient email, Patient language (set to English), and Consent date. Below this is a browser window showing an email from the Andaman7 Team. The email content includes the Andaman7 logo, a greeting, and instructions to activate the account by clicking a button labeled 'Activate my Andaman7 account'. It also mentions that Andaman7 is used to collect and anonymize answers before sending them back to the study manager.

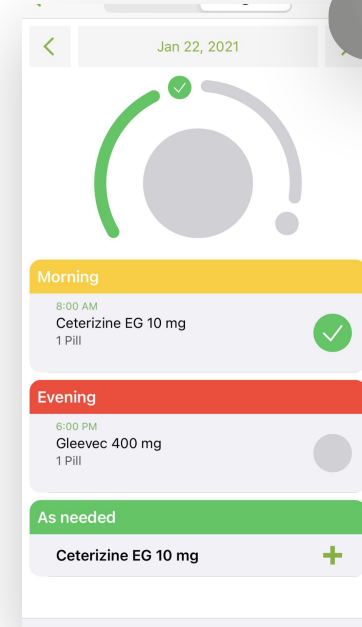

More? Patient empowerment

Data ownership

Education

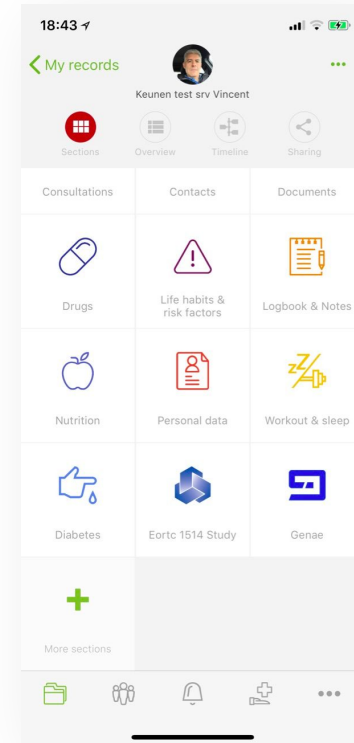

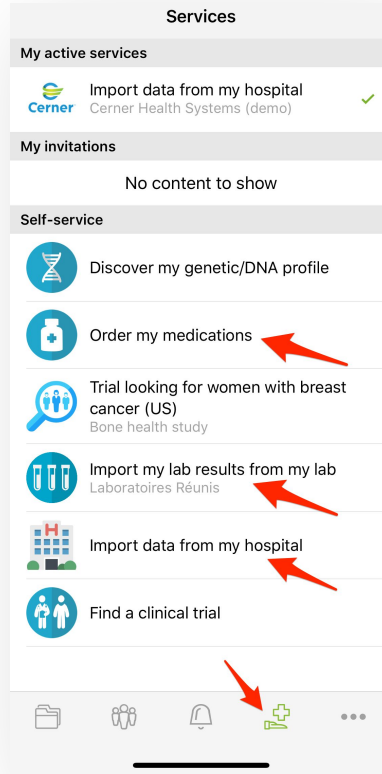

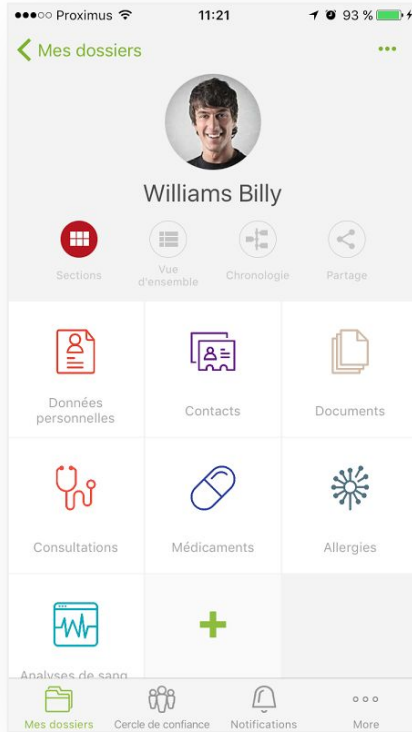

Medication adherence

85% of US patients can get their data

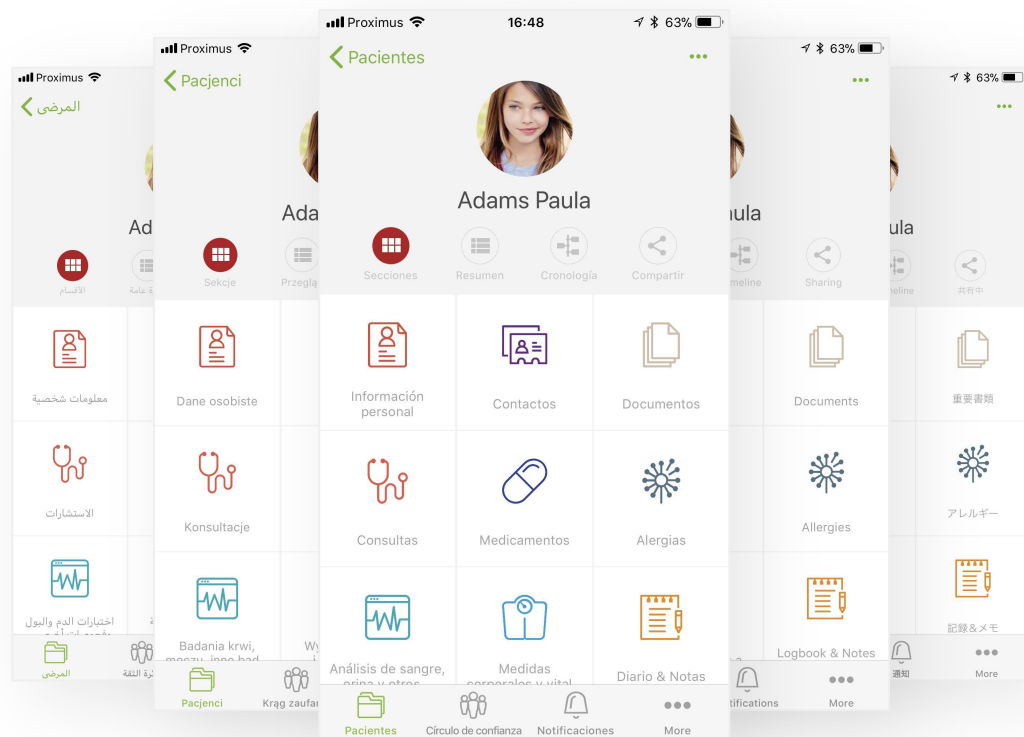

Patient services open to third parties

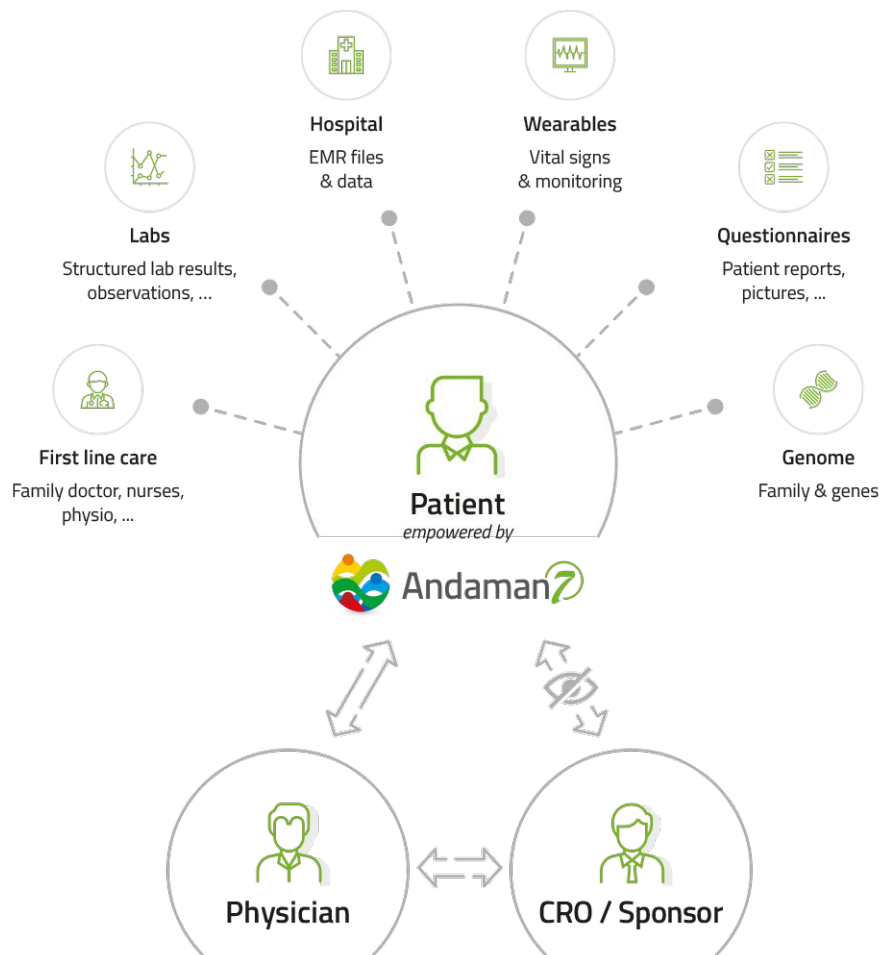

Global Reach

Available in the
20 most spoken
languages on earth

Andaman7 works with all

- data types
- formats
- protocols
- sources

Bridge the gap between care & research

A real need, vital for some, a unique UI/UX

The idea of centralizing all my health data and sharing it with trust is just excellent ! Keep on going !

I was really impressed with the concept of taking control of my own medical records for me and my family. I have put all my basic family information into the app. I really appreciated the app when my husband had a ski accident and required emergency neurosurgery. I had all the information I needed in my phone!

I downloaded your app because I was looking for something similar for a long time. My treatments are serious and could have fatal interactions.
Your app is VITAL to me. Congratulations !

When I go to Russia, doctors understand a bit of English so can read my medical records.

Could you please ask my hospital to send all the data of my husband ? I has had a cerebral hemorrhage and I really need the data.

I received my full medical record from my hospital with the complete history ! In one word, an awesome app !

I found that app excellent and easy to use.

I can't wait for my hospital to use it !

I am 78 years old and my Andaman7 is quite full !

I'm talking about it to everyone I can !

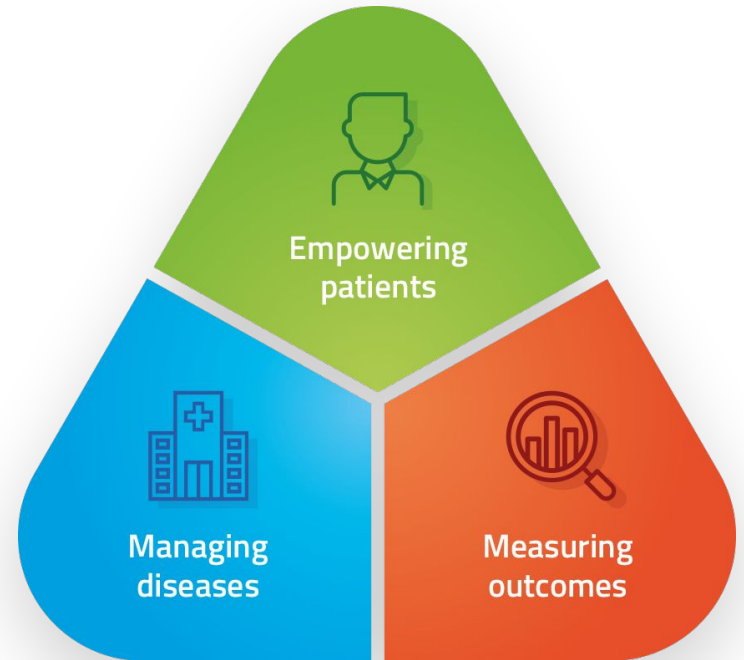

Yes we can ! do all 3...

- › Empowering patients
- › Managing diseases
- › Measuring outcomes

One **unique platform**
for **all conditions**
for research & care

... with patients engagement

Patients of the future.

Work for them?

Work WITH them!
