INDUSTRY

ROBOTIC HAND FOR INDUSTRIAL APPLICATIONS

Soft-robotics  
technologies for

INDUSTRY

RESEARCH

EDUCATION

The **qb SoftHand Industry** is an advanced anthropomorphic robotic hand, designed by **qbrobotics** for **industrial applications**. Thanks to its elastic joints and unique motion transmission system it autonomously adapts to the grasped object. Five mechanically connected fingers allow this end-effector to have both a **large gripping surface** and an adaptability level not found in other grippers. These peculiar features make the **qb SoftHand Industry** suitable for testing in all industrial applications where **human manipulation** is needed.

**THE FIRST** ROBOTIC HAND  
**CERTIFIED** FOR COLLABORATIVE  
ROBOTICS **ISO/TS 15066:2016**

**INTERCHANGEABLE GLOVES**  
**FOR SPECIAL APPLICATIONS**

**WATER AND DUST**  
**RESISTANCE IP65**

PRODUCT PAGE

#### COMPATIBLE ROBOT BRANDS

UNIVERSAL ROBOTS

KUKA

ABB

FANUC

**SIZE AND ANATOMY** LIKE HUMAN HANDS  
**FOR** **ERGONOMICS** AND **DURABILITY** TESTS

Suitable for **food** and **horticulture**

#### MAIN APPLICATIONS

**TESTING &**  
**QUALITY INSPECTION**

i.e. luxury, household appliance  
industry, etc...

**MANIPULATION IN**  
**AGRI-FOOD SECTOR**

**PICK & PLACE**

**RECYCLING OF**  
**ELECTRONIC WASTE**

**MACHINE TENDING**

Adaptability and  
adjustable **wrist**  
for **special tasks**
