

Co-creating Urban Futures

Forum Virium Helsinki is a nonprofit innovation company owned entirely by the City of Helsinki. We co-create climate-friendly digital services and solutions with companies, municipalities, universities and citizens.

As a project partner, we offer you:

- Climate change mitigation and digitalization of city services
- Co-creation model including +500 citizens actively engaged
- Extensive national and EU R&I collaboration experience
- 150 successful EU projects with 70 M€ EU funding received
- The City of Helsinki as a Living Lab and domain-based testbed for piloting
- +600 open data sources
- Urban data space
- PCP and agile piloting concepts
- Nationwide innovation network of 6 largest cities in Finland

Forum Virium Helsinki has been a pioneer in making cities smart, sustainable and functional. We have pushed for the public data opening on the world's biggest open data platforms in Helsinki. We have piloted autonomous buses and life-saving drones. We have developed the renowned Smart Kalasatama district. Helsinki consistently ranks on the top of Smart City related studies, being the world's second-best Smart City in 2020.

Contact us now and let's talk about new innovation projects!
