implement new
solutions

ROADMAPPING
We help you adopt a
strategy

6- MONTHS

We are a leading European robot innovation centre with 45 specialists who introduce tomorrow's robot technology to both global businesses and emerging entrepreneurs.

We invent and develop new robots and robot solutions in close collaboration with industry and our international network - whether the robot has arms, legs, wheels or wings.

In short, our expertise is as wide-ranging as our customers.

If you need strategic and down-to-earth advice on the use of new robot technologies, we are ready to help.

To visit your company and clarify your automation potential.

To build pilot solutions and test robot concepts together with you.

To provide you with a strategic roadmap, so you will be able to choose the best technology for your company.

Contact us if you would like independent advice about how to go one step further with robot technology.
